

Drum handling trolley h883_70

Professional trolley for 220L steel drums, load capacity 450 kg. Multifunctional handle with integrated bung wrenches and drum tipping lever.

The **h883_70 drum handling trolley** represents an advanced technical solution for the logistics management of **220-liter** steel drums (dimensions 595 x h 880 mm). Designed to operate in industrial contexts, workshops, and warehouses, this tool resolves the critical issues related to the **lifting and horizontal positioning** of heavy loads, ensuring maximum safety for the operator.

The distinguishing element of the model is the **multifunction traction handle**: in addition to handling, the terminal structure is shaped to operate as a **bung wrench** (compatible with 2" and 3/4" sizes) and as a **drum tipping lever**, facilitating the tilting of the container from the vertical to the horizontal position without excessive effort.

Technical features

- **Type:** Trolley for handling drums in horizontal position
- **Compatibility:** 220-liter steel drums (595 x h 880 mm)
- **Maximum load capacity:** 450 kg
- **Empty weight:** 16 kg
- **Wheel system:** 2 front wheels Ø 150 mm and 1 rear wheel Ø 75 mm
- **Multifunction handle:** Traction, bung wrench (2" and 3/4") and tilting lever
- **Functionality:** Handling, opening, lifting and positioning
