

Drum storage box for 2x200 l drums h849_24

Steel drum storage box for 2 drums of 200 l. Dimensions 134x85x145 cm, capacity 230 l, with hinged doors and lateral ventilation louvers.

The **drum storage box** is a technical solution designed for the safety of hazardous and polluting liquids within factories, warehouses, and industrial plants. The structure meets the need to store chemicals or oils in compliance with environmental regulations, preventing accidental spills into the soil thanks to the **integrated collection sump**. Made of high-resistance **steel** and finished in **orange RAL 2010**, the box guarantees complete physical protection of the drums against impacts and unauthorized access.
