

Drum storage box for 4x200 Lt drums h849_25

Steel cabinet for the storage of 4 drums of 200 Lt, with a 280 Lt sump, hinged doors and lid. Ideal for safety in industrial environments.

The **drum storage cabinet** represents a professional solution for the management and securing of hazardous substances within work environments. The structure is entirely made of high-resistance **steel**, designed to withstand the typical stresses of the industrial sector. The containment system is equipped with **hinged doors** and an **upper lid**, which allow easy access to the drums while ensuring full protection of the load.

To prevent the saturation of vapors inside the compartment, the cabinet integrates **ventilation slots** strategically positioned on the side walls. Environmental safety is guaranteed by a collection sump with a **capacity of 280 liters**, sized to intercept any accidental spills from the stored drums. The **orange RAL 2010** paint finish ensures high visibility of the storage area, which is fundamental for safety in plants and warehouses.

Technical specifications

- Dimensions: **W. 134 x D. 125 x H. 142 cm**
- Sump capacity: **280 Lt**
- Storage capacity: **n. 4 drums of 200 Lt** (not included)
- Construction material: **steel**
- Color: **orange RAL 2010**
- Access systems: **hinged doors and upper lid**
- Ventilation: **integrated side slots**
