

Drum storage sump pallet for liquid collection h874_23

Sump pallet for storing 6 drums of 60 liters, made of sheet steel with a galvanized grate. Dimensions: W 1310 x D 800 x h 200 mm.

The **drum storage sump pallet for liquid collection h874_23** is designed to ensure adequate safety in the management of industrial liquids. Ideal for the containment of accidental spills, it allows for the **storage** of up to **6 drums of 60 liters each**, making it a perfect solution for workshops, chemical industries, and production environments.

The sump is made of **3 mm sheet steel**, a material known for its robustness and durability. The **galvanized grate** offers a load capacity of **1000 kg/m²**, ensuring the ability to support heavy loads without compromising stability. The structure features a height of 100 mm under the loading threshold, facilitating access for positioning the drums.

With a **collection volume of 63 liters**, this sump is a reliable choice for the containment and management of any liquid leaks. The design is finished in **RAL 2000** color, but upon request and prior quotation, it is possible to request **different RAL colors** or a completely galvanized version, to adapt to the aesthetic and functional needs of any context.

Thanks to its practical design and compact dimensions (**W 1310 x D 800 x h 200 mm**), the sump is easily integrable into different workspaces, providing a functional and durable solution for liquid collection.

Choose the **storage sump h874_23** for safe and efficient management of your industrial liquids. Invest in safety and quality: **order now!**

Technical features:

- **Dimensions:** W 1310 x D 800 x h 200 mm
- **Maximum capacity:** 6 drums of 60 liters
- **Collection volume:** 63 liters
- **Material:** 3 mm sheet steel
- **Galvanized grate:** load capacity 1000 kg/m²
- **Height under loading threshold:** 100 mm
- **Weight:** 55 kg
- **Standard color:** RAL 2000
- **Available customizations:** different RAL colors or galvanized version upon request and prior quotation

User benefits:

- **Guaranteed safety:** designed to prevent spills and protect the working environment.
- **Robustness:** steel structure and galvanized grate for long life and resistance.
- **High capacity:** allows for the storage of up to 6 drums of 60 liters.
- **Adaptability:** customization options for color or complete galvanization, upon prior quotation.
- **Ease of use:** height of 100 mm under the loading threshold for easy access.

FAQ:

1. What types of liquids can I store in the sump?

The sump is suitable for containing industrial liquids such as oils, solvents, and other non-corrosive liquids, after verifying compatibility with the material.

2. Is the sump suitable for outdoor use?

Yes, thanks to the robustness of the structure and the possibility of complete galvanization, the sump is perfectly suitable for outdoor environments.

3. **Is it possible to use drums of different capacities?**

The sump is designed for 60-liter drums, but it is also compatible with containers of similar dimensions, checking stability and the maximum allowed volume.

4. **How can I request a galvanized version?**

It is possible to request the galvanized version or different RAL colors by contacting us for a personalized quotation.

5. **What is the maximum load capacity of the galvanized grate?**

The grate supports a maximum load of 1000 kg/m², ensuring maximum stability even with full drums.

Mini buying guide:

Opting for the **storage sump h874_23** means investing in a reliable and safe product for managing industrial liquids. This device is designed to optimize space and ensure a safe work environment compliant with standards. Thanks to its capacity to hold up to **6 drums of 60 liters**, it is ideal for workshops, chemical industries, and other production environments with a need for safe storage.

The **sturdy steel structure** and the **galvanized grate** with a capacity of 1000 kg/m² ensure resistance and durability, while the **collection volume of 63 liters** is perfect for managing any spills. Before purchasing, evaluate your space requirements and consider the customization options offered, such as galvanization or different RAL colors.

Don't leave anything to chance: choose the h874_23 sump for a practical, safe, and customizable solution!

Industrial liquid collection sump, drum container, safe liquid storage, sump for oils and solvents, steel structure for liquids, galvanized grate for drums, safe liquid management, industrial anti-spill sump, sturdy steel container, drum storage accessories, equipment for chemical industries, RAL 2000 steel sump, resistant liquid collection, customizable liquid sumps, galvanized drum containers.
