

Drum storage unit with collection sump h977_06

UV-stabilized polyethylene drum storage box (154x160x235 cm) with 1100L sump for safe outdoor storage of 1000L IBC tanks. The **h977_06 drum storage box** represents an advanced technical solution for the **safe containment of hazardous liquids**. Specifically designed to house a 1000-liter IBC tank, this system actively protects the work environment and the soil from accidental spills of corrosive substances, acids, bases, and oils. The integral structure in **UV-stabilized virgin polyethylene** guarantees exceptional resistance to atmospheric and chemical agents, making it ideal for placement in outdoor areas of industrial and chemical plants.

Technical features

- **Material:** 100% high-density UV-stabilized virgin polyethylene
- **Sump collection capacity:** 1100 liters
- **External dimensions:** W 154 x D 160 x H 235 cm
- **Empty weight:** 205 kg
- **Maximum load capacity:** 1500 kg (uniformly distributed load)
- **Color:** Industrial green
- **Internal configuration:** Polyethylene support table for maximum stability
- **Chemical resistance:** High compatibility with acids, bases, and mineral oils
- **Handling:** Designed for forklift with long forks (operation to be carried out exclusively while empty)
