

Drum support h883_01

Stackable support for horizontal storage of 1 x 200-liter drum. Steel structure, capacity 225 kg, dimensions 78x60x75h cm. This **drum support structure** is designed specifically for the logistical organization and securing of cylindrical containers in industrial environments. The support allows for the horizontal positioning of a 200-liter drum, facilitating not only storage but also any tapping and decanting operations. The **stackable** configuration addresses the need to optimize warehouse volumes, allowing for the vertical development of storage without compromising load stability.

Technical features

- **Configuration:** stackable support for vertical space optimization
- **Loading capacity:** ideal for 1 x 200-liter drum
- **Maximum load capacity:** 225 kg
- **Dimensions:** 78 x 60 x h. 75 cm
- **Layout:** horizontal storage to facilitate liquid extraction

Image purely indicative. Drum not included in the supply
