

Dry iron for hotels h164_57

Iron with 1200W power and non-stick soleplate that allows hotel guests a smooth and easy ironing experience.

The **h164_57 dry iron** is a technical solution designed for hospitality facilities that prefer an essential, safe, and ecological ironing system. With a power of **1200W** and a **non-stick soleplate**, this device allows guests of hotels and B&Bs to iron their garments extremely smoothly, eliminating the need for water and limescale management typical of steam models. The product's strength is the **integrated auto-off system**, which activates after only 30 seconds if the iron is left in a horizontal position and after 8 minutes in a vertical position, ensuring maximum protection for furnishings and the hotel structure. Thanks to the compact design and the 2.5-meter cable, it solves the operational problem of electrical safety and ease of placement within the rooms.

Technical features
