

Duckling spring rider h749_03

Duck-shaped spring rider in three-layer HDPE (15 mm), dimensions 37x26x92 cm. Ideal for outdoor play areas and children from 2 to 6 years old.

The **h749_03** spring rider is a professional play element designed for the furnishing of public gardens, municipal parks, and outdoor recreational areas. The structure, characterized by a duck-shaped design, is engineered to stimulate children's motor coordination and balance in total safety. Thanks to the use of high-resistance materials, the product guarantees a long service life even in high-traffic contexts, effectively resisting mechanical stress and atmospheric agents.
