

Ductile iron manhole cover 55x55 cm h638_96

Ductile iron manhole cover. Load class D400. Dimensions: 550x550 mm.

Ductile iron manhole cover produced by an ISO 9001:2015 certified company, in accordance with the latest edition of the **UNI EN 124** standard, **load class D400**, consisting of a square frame at both the base and the top corresponding to the road surface level, equipped with an adequate external perimeter flange, continuous on four sides, suitably shaped and rounded at the corners to obtain a larger support base and allow for **better anchoring to the foundation** also through holes/slots, useful for fixing with anchor bolts. Square cover equipped with a slot suitable for the **opening and lifting key**; internal attachment for coupling to the frame; space for inserting any text and/or logos (e.g. contracting authority + etc.); anti-slip patterns uniformly distributed for the complete drainage of runoff water.

Technical features:

- Material: ductile iron
- Load class D400
- Square frame
- Square cover
- External dimensions: 550x550 mm
- Clear opening: 450x450 mm
- Height: 75 mm
- Weight: approx. 41 kg
