

Ductile iron manhole cover class B125 h638_76

Road manhole cover with square shape and airtight seal. Dimensions: W.500xD.500.H.30mm

Ductile iron manhole cover certified GJS-500-7 – EN 1563 and loading class **category B125** equivalent to the passage of **pedestrians and cars**, therefore suitable for the safety of **sidewalks, pedestrian zones, and parking areas** and **car stops**. The resistance is 125 kN and it has a **square** shape corresponding to both the frame as a support base and the road-level cover. The product also features **automatic closure and is airtight** with an internal seat structured in a “U” shape to achieve more **effective odor-tight security** through **filling with sand or material of equal consistency**.

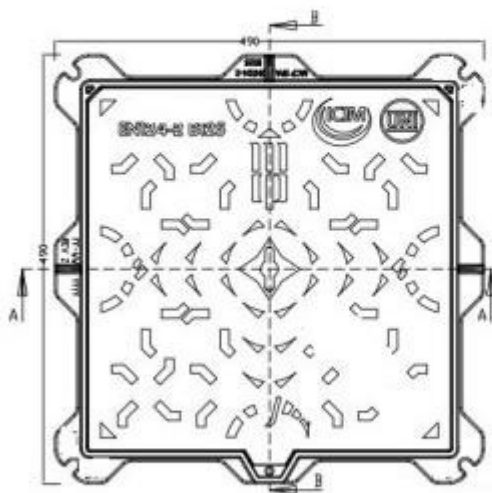

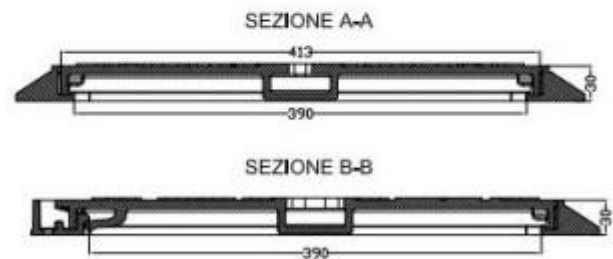

Technical Features:

- Material: ductile iron
- Loading class B125
- Suitable for pedestrians and cars
- Installation for sidewalks, pedestrian zones, car parking areas.
- Dimensions: W.500xD.500.H.30mm
- Net opening: 400x400
- Automatic closure - airtight
- Outflow channels and identification markings
- Square frame and cover.
