

Ductile iron manhole cover h638_24

Road manhole cover with square frame and round lid. Material: ductile iron. Dimensions: 110 x 110 cm.

Road manhole cover, ideal for covering manholes in vehicle or pedestrian traffic areas. Designed for **load classes D400** and therefore for installation on traffic routes such as provincial and state roads and parking areas. Made of **ductile iron**, a material characterized by **high mechanical resistance** which allows for the **containment of heavy weights**. Consisting of a **square frame** with anti-noise and anti-tilting elastomer gasket and **circular lid** with key lock and space for lettering.

Technical features:

- Dimensions: 110 x 110 cm
- Height: 10 cm
- Clear opening: Ø100 cm
- Material: ductile iron
- Weight: 142 kg
- Frame shape: square
- Lid shape: circular
- Key lock
- Gasket
- Hinge 110° Max
- Hinge 90° block
- Product compliant with UNI EN 1563 standard, load class D400
