

Ductile iron road gully h638_45

Ductile iron road gully with anti-slip embossments and concave surface. Dimensions: 600 x 600 mm.

The road gully is a fundamental urban furniture element for the correct collection of rainwater, while ensuring the safety of pedestrians and motorists. The gully features a **ductile iron structure** consisting of a frame and a square grate. **The frame** is equipped with: external perimeter flange, reinforcing ribs, shaped lugs, holes for the grate articulation, and internal tabs at the four corners for housing an optional siphon. **The grate** consists of parallel slots, holes for articulation to the frame, and a pair of nuts and bolts inserted to **prevent theft and tampering**.

Technical features:

- Material: ISO 9001:2015 certified ductile iron
- Concave surface
- Concavity: 15 mm
- Siphonable
- Anti-theft locking
- Automatic closing
- Compliant with DPR 503/96
- With hinge
- External dimensions: 600x600 mm
- Clear opening: 600x600 mm
- Height: 65 mm
- Drainage area: 15.36 dm²
- Weight: 40 kg

INFORMATION

- Length in millimetres 600.000000
- Depth in millimetres 600.000000
- Height in millimetres 65.000000
