

E-bike charging bike rack h337_31

Charging station for electric bikes. Spaces: 5. Dimensions: W215 x D50 x H145 cm.

E-bike rack, ideal for use in city centers near parks and cycle paths. Also perfect for accommodation facilities offering traditional and electric bike rental services. Specially designed **for outdoor use** thanks to its **galvanized and painted steel** structure. Designed for **ground fixing** and equipped with a **high and low bike parking system** that allows any bike model to be optimally placed. Capable of ensuring maximum safety for the user thanks to the **anti-theft flanges** on the frame that reduce the possibility of theft. The size of the stalls is suitable for accommodating **bikes with larger diameter wheels**. Complete with a **double-sided neutral PVC sign**, customizable on request.
