

## Electric variable height medical bed h562\_19

Electric medical bed 3 joints 4 sections with electro-welded mesh. Capacity: 135 kg. Adjustable height.

**Medical bed designed for hospital and home care. Electric model with 4-section bed base, with electric adjustment of the backrest and legs, to ensure maximum comfort for patients. The bed base is height-adjustable from a minimum of 400 mm to a maximum of 800 mm from the ground. Structure in painted steel with wooden panels. Equipped with handset to activate different functions and 2 actuators positioned at the ends to activate the Trendelenburg and Anti-Trendelenburg function. Equipped with 4 swivel wheels with parking brake. Includes side rails and patient lifter pole.**

### Technical features:

- Electric model
- Materials: painted steel and wood
- 4-section electro-welded mesh base, height adjustable
- 3 joints
- Mattress retainers on the base
- Electric adjustment of the backrest and leg section
- Manual adjustment of the foot area via rack
- Height adjustment of the bed base from a minimum of 400 mm to a maximum of 800 mm
- Handset
- 2 actuators
- Anti-blackout backup battery for emergency and power failure
- Side rails
- IV pole
- Trendelenburg and Anti-Trendelenburg position
- Overall dimensions: 2160 x 1020 mm
- Capacity: 135 kg
- Maximum working load: 180 kg
- Bed base dimensions: 1950 x 900 mm
- Headboard/footboard height from bed base: 455 mm
- Internal distance between footboard and headboard: 2050 mm
- Head section dimensions: 800 x 740 mm
- Fixed pelvic section dimensions: 900 x 205 mm
- Leg section dimensions: 800 x 300 mm
- Foot section dimensions: 800 x 460 mm
- Maximum inclination of movable back section: 70°
- Maximum inclination of movable leg section: 35°
- Maximum inclination of movable foot section: 22°
- Maximum height of movable leg section from bed base: 220 mm
- Maximum bed inclination:  $\pm 11^\circ$
