

Electric articulated hospital bed h30911

Electric bed for the elderly and disabled with melamine-coated MDF panels and painted steel structure. 100% Made in Italy. Capacity: 170 kg.

Hospital bed ideal for hospitals, nursing homes and clinics equipped with removable headboards with quick plug-in without the use of tools with melamine-coated MDF panels. Sturdy frame in **epoxy powder-coated steel profiles**; the base in 50x20x2 mm rectangular section profile with 4 sections with electro-welded rectangular mesh diam. 5 mm with 10x5 cm rectangular section and reinforced. Headboard with variable inclination up to 85° by means of electric actuator and seat part inclinable at 35° with connecting bars following from the leg rest part. Movements occur **via 24 V low-voltage electric actuators** with remote control and push-button panel. The bed for the elderly and disabled has a **backup battery** to be used to reset the inclination angles in case of failure or power outage.

The aid meets the requirements of Directives 93/42/EEC and 2007/47/EC being compliant with the Harmonised standard EN 1970.

Technical features:

- Powder-coated tubular steel structure
- Structure color: light grey
- MDF infill panels 1 cm thick covered in melamine
- Panel finish: wood
- Operation: electric
- Protection degree: IP56 according to CEI EN 60601-1 and CEI EN 60601-2 standards
- Fixed sacral support area
- Weight: approx. 51 kg
- Dimensions: 206x90xh.45+48 cm
- Capacity: 170 kg
- Italian Product
- CE Compliant

All materials used for the construction of the aid are hypoallergenic, non-toxic and recyclable.
