

Electric car charging box h766_01

Electric vehicle charging box equipped with 1 type 2 panel socket. Cover, shutter and anti-extraction interlock included.

Electric car charging station with ultra-fast charging system, **single-phase max. 32A (7 kW)**. Equipped with **type 2 socket** with one-hand insertion, compatible with 100% of electric cars on the market. **Integrated cover, shutter and anti-extraction interlock**. Its **interface** is simple and immediate, **with a LED visual system**. Prepared for **wall mounting**. **Product entirely manufactured in Italy**.

Technical features:

- Compact dimensions: W. 360 x D. 150 x H. 360 mm
- Material: glass-fiber reinforced polycarbonate
- Color: RAL 7000
- Mounting: wall-mounted
- 1 type 2 panel socket with integrated shutter, interlock and cover
- Overcurrent, short-circuit and type B residual current protection
- MID certified energy measurement
- LED visual interface
- Mode 3 charging with pwm pilot circuit
- Control system with detection of correct cable insertion, charge status signaling, socket availability signaling
- Automatic charge recovery following power supply interruption
- Rated voltage: 230 Vac
- Frequency: 50-60 Hz
- Insulation voltage: 230 Vac
- Protection degree: IP55
- Operating temperature: -25 °C + 40 °C
- Charging cable not included
- 1 anti-vandal start-stop charging button
- Multicolor LED for socket status signaling
- USB port (internal)
- Mounting: wall or pole (not included)
- Compliant with current regulations
- Made in Italy

** Upon request and subject to a quote, it is possible to install the paid service for electric vehicle charging.*
