

## Electric gynecological examination table with adjustable height h904\_44

Electric gynecological table in black metal and eco-leather, height 47-90 cm. Double-upright structure with hydraulic adjustments and 250 kg capacity.

The **gynecological examination table h904\_44** represents an advanced professional solution for medical practices and specialist clinics that require a versatile and robust examination station. Thanks to the integrated electric lifting system, the work surface can be moved vertically to facilitate patient access and ensure an ergonomic posture for the healthcare operator during diagnostic procedures.

The technical configuration is designed to offer maximum stability through a **double-upright frame** in black metal, capable of supporting high operating loads. The modularity of the sections, managed via hydraulic actuators and manual mechanisms, allows the table to be quickly adapted to different clinical needs, while comfort is ensured by high-density padding and specific supports for the lower limbs.

## Technical specifications

- **Dimensions:** L. 200 x D. 62 x h. 47 - 90 cm
- **Maximum capacity:** 250 kg
- **Height adjustment:** electric system with side rails (47-90 cm)
- **Structure:** metallic with black double-upright frame
- **Upholstery:** medical-grade eco-leather, available in various colors
- **Padding:** technical foam, 5 cm thickness
- **Head/backrest section:** adjustment via hydraulic system
- **Middle section:** adjustment via hydraulic system
- **Foot section:** manually adjustable
- **Equipment:** leg supports included
