

Electric heater h932_01

Electric heater with 2000W PTC element, adjustable handle and dual power. Ideal for workshops and residential environments up to 20 m².

The **portable electric heater** represents a versatile and efficient solution for the thermal conditioning of small professional and domestic environments. Designed to operate in demanding contexts such as workshops or residential environments, the device integrates a **PTC heating element** (Positive Temperature Coefficient), which guarantees constant heat output and high operational safety. The presence of a dual power selector and the fan function allows the air flow to be adapted to specific seasonal and environmental needs, ensuring immediate comfort.

Technical specifications

- **Dimensions:** 21 x 16 x 21.7 cm
- **Heating element:** PTC ceramic technology
- **Heating levels:** Dual selector (1000W / 2000W)
- **Functions:** Integrated heating and ventilation
- **Safety:** Overheating protection
- **Direction:** Adjustable handle to direct the hot air flow
- **Power supply:** 220-240V 1Ph-50Hz
- **Heating power:** 1000/2000 W
- **Maximum covered area:** 20 m²
- **Air output (flow rate):** 100 m³/h
