

Electric hospital bed 3-joint 4 adjustable sections h937_20

H937_20 3-joint bed, electric adjustment of backrest and legs, steel frame, Dimensions: W. 2060 x D. 910 x H. bed base 470 mm.

The **H937_20 3-joint hospital bed** is an ideal solution for healthcare facilities, nursing homes, and home care. Thanks to its **solid and resistant structure** in painted steel, it guarantees high durability and resistance over time, making it perfect even for intensive use. The **4 sections of the bed base** have been designed to ensure maximum patient comfort, allowing easy position adjustment thanks to the **24V DC electric motor**. The headrest section and the leg section can be adjusted via a **handset** that allows immediate and intuitive management of different inclinations, facilitating patient assistance and care. The **foot section** adjusts automatically along with the leg section, optimizing comfort, while the **pelvis section** remains fixed to ensure a stable and safe position.

The bed is equipped with **2 integrated supports for a patient lifter pole and IV pole**, fundamental accessories (not included in the supply) for lifting needs and for positioning IVs or other medical instruments. These supports, already present in the structure, simplify the assembly of accessories without having to further modify the bed structure.

The **ends** are made of **painted steel tube** with a round section Ø 30x1.5 mm. The **melamine-faced panels** are easily **removable**, making maintenance and cleaning quick and easy, a crucial aspect especially in hospital contexts where hygiene is fundamental. The finish of the bed, obtained thanks to an **epoxy powder coating** baked at 200°C, provides excellent resistance to scratches, wear, and aggressive cleaning products, keeping the bed in perfect condition over time.

Thanks to its **compact dimensions** (W 2060 x D 910 x H. bed base 470 mm) and a **weight** of only **38 kg**, the bed is easily maneuverable, adapting even to the smallest spaces without compromising functionality. Furthermore, the **safe working load** of 170 kg and the **capacity** to support a patient **up to 135 kg** make it ideal for a wide range of users.

This hospital bed not only meets safety and comfort requirements but is also designed to ensure ease of use for both patients and healthcare operators, making every daily activity easier and more efficient.

Order the H937_20 electric hospital bed now to offer your patients comfort and safety. Contact us for more information and personalized quotes.

- **Headboard/footboard height:** 460 mm
- **Overall dimensions:** 2060 x 910 mm
- **Headrest section:** 750 x 785 mm
- **Pelvis section:** 890 x 305 mm
- **Leg section:** 785 x 410 mm
- **Foot section:** 785 x 400 mm
- **Safe working load:** 170 kg
- **Maximum patient weight:** 135 kg
- **Net weight of the bed:** 38 kg

- **Gross weight of the bed:** 45 kg

User benefits:

- **Simple and intuitive electric adjustment** for better patient positioning
- **Robust steel frame**, guaranteed for long durability
- Easy maintenance with **removable panels**
- **Essential accessories included:** supports for patient lifter pole and IV pole

FAQ:

1. **How big is the bed?**
The dimensions of the bed are: **W 2060 mm x D 910 mm x H 470 mm** (bed base height).
2. **What is the maximum load it can support?**
The bed has a safe working load of 170 kg and can support patients up to 135 kg.
3. **Is the bed compatible with standard mattresses?**
Yes, the bed is compatible with most standard hospital mattresses, provided the mattress dimensions are suitable for the **890 x 1990 mm bed base**.
4. **Is the bed easy to clean?**
Yes, the removable melamine panels and epoxy painting allow for easy cleaning and maintenance.
5. **What is the energy consumption of the electric motor?**
The 24V DC electric motor is highly efficient and has low consumption, ideal for continuous use without weighing on energy costs.

Mini buying guide:

Choose a hospital bed like the H937_20 if you want a product with electric adjustment to improve patient comfort and facilitate care. Always check the maximum capacity and dimensions of the bed to suit your needs. Included accessories, such as the supports for the patient lifter pole, can make the bed even more versatile.
