

Electric hospital bed with Trendelenburg h23083

Electric hospital bed ideal for nursing homes and residential care facilities. Adjustable backrest and leg rest. Vertical movement of the surface.

An ideal product to ensure maximum comfort and functionality for patients in nursing homes, clinics, or for the disabled and elderly confined to bed.

The h23083 hospital bed is equipped with a backrest adjustable up to 75° and a leg rest adjustable up to 40°. The surface features iron slats, the side rails are in wood-effect aluminum, and the frame is made of painted tubular steel. The headboard, footboard, and side rails are made of wood laminate.

It is mounted on four swivel wheels with a diameter of 125 mm, all with locking mechanisms.

The surface features **vertical movement** ranging from a minimum height of 40 cm to a maximum height of 80 cm.

Additionally, via the handset control, **Trendelenburg movement** up to 12° and anti-Trendelenburg up to 12° are possible, thanks to the independent movement of the two electric actuators integrated into the footboard and headboard.

The **patient lifting pole** is included.

Technical features:

- External dimensions: cm. 212x102x89/130 height
- Bed base dimensions: cm. 191x80x20/76 height from the ground to under the base
- Weight: kg. 81
- Maximum weight supported: kg. 170
- ISO classification: 18.12.10.003 + 18.12.27.103 + 18.12.12.103 + 24.36.06.103 + 12.30.09.103

The bed is supplied disassembled, mounted on a transport device. It consists of two ends (headboard and footboard), a bed base divided in the center; four side rails and a patient lifting pole with a triangular handle. The bed rests on four swivel castors, all equipped with locking brakes.
