

Electric hospital bed with wooden slats h562_20

Electric wooden hospital bed with variable height. With side rails. Capacity: 135 kg. Maximum dimensions: 2165 x 1020 mm.

Fully electric hospital bed equipped with a **4-section bed base, which articulate independently or together**, allowing patients to take positions from lying to sitting. The **structure** is made of **painted steel** with **wooden slats** and **wooden panels**. Equipped with **height-adjustable side rails**, designed to protect the patient from potential falls, ensuring maximum safety. They are present on both sides and can also be lowered when not in use. Includes **hand control** for activating the various functions and **2 actuators for Trendelenburg and Anti-Trendelenburg functions**. The **bed base** is **height-adjustable** and is equipped with **mattress retainer blocks** (mattress not included). **Parts of the backrest and legs are electrically adjustable**. The **foot area** is **adjustable via a rack mechanism**. Equipped with **4 swivel wheels with parking brakes** for moving the device in total safety. In case of power failure, it is possible to return the bed to the resting position thanks to the presence of an **anti-blackout backup battery**.

Technical features:

- Type: electric
- Materials: painted steel and wood
- 3-joint 4-section bed
- Height-adjustable side rails
- Mattress retainer blocks on the bed base
- Electric adjustment of the backrest and the thigh/leg section
- Manual adjustment of the foot area via rack mechanism
- Height-adjustable bed base
- Patient lifting pole
- 4 swivel wheels with parking brake
- Hand control
- Anti-blackout backup battery
- Wooden slats
- Maximum dimensions: 2165 x 1020 mm
- Weight: 90 kg
- Maximum capacity: 135 kg
- Maximum working load: 180 kg
- Bed base dimensions: 1900 x 900 mm
- Bed base height from floor: min 390 max. 790 mm
- Headboard/footboard height (from the bed base): 465 mm
- Internal distance between footboard and headboard: 2025 mm
- Internal distance between side rails: 955 mm
- Head section dimensions: 800 x 740 mm
- Fixed pelvis section dimension: 900 x 205 mm
- Leg section dimensions: 800 x 300 mm
- Foot section dimensions: 800 x 460 mm

- Maximum inclination of the movable back section: 70°
- Maximum inclination of the movable leg section: 35°
- Maximum inclination of the movable foot section: 24°
- Maximum height of the movable leg section from the bed base: 205 mm
- Bed base weight: 38 kg
- Weight of 1 pair of wooden side rails: 4.4 kg
- Weight of patient lifting pole: 3.2 kg
- Maximum bed inclination: $\pm 11^\circ$
