

Electric nursing bed h30912

Motorized nursing bed with variable height with a 4-section base made of electro-welded rectangular mesh. Bed surface adjustable from 32 to 42 cm from the ground.

Hospital bed **with variable height** ideal for the elderly and disabled; suitable for clinics, hospitals, nursing homes, and rest homes. Sturdy structure with a **frame made of epoxy powder-coated steel profiles** complete with a 4-section base made of electro-welded rectangular mesh diam. 6 mm with 10x5 cm rectangular section and reinforced.

Headboard with variable inclination up to 85° by means of an electric actuator with push-button remote control and seat part inclinable up to 35° with connecting bars following from the leg rest part.

The **nursing bed for disabled people** has a 24 V direct current regulation control unit connected by a spiral cable with a wall power socket, with a power supply inhibition system in case of failure and short circuit. The **backup battery** allows for resetting the inclination angles in the event of a power failure.

The aid meets all the requirements of Directives 93/42/EEC and 2007/47/EC, being compliant with the Harmonized Standards UNI EN 12182, EN 1970

Technical features:

- Material: powder-coated steel
- Color: light gray RAL 7044
- 4 sections made of electro-welded rectangular mesh Ø 6 mm with 10x5 cm rectangular section and reinforced
- Bed surface adjustable from 32 to 42 cm from the ground
- Height variation system of 42 cm and/or base inserted in the headboards which are vertically sliding
- Fixed sacral support area
- Plastic feet at the bases
- Degree of protection: IP56 according to CEI EN 60601-1 and CEI EN 60601-2 standards.
- Upper part load capacity: 175 Kg
- Lower part (base) load capacity: 235 Kg
- Weight: approximately 80 Kg
- Side rails not included
- CE compliant

Optional side rails:

- side rails in natural painted solid wood with rounded edges complete with attachments and plastic sliding blocks at both ends for insertion on the headboards

Optional wheels

- Set of 4 125 mm wheels, two with brakes for bed legs

All materials used for the construction of the aid are hypoallergenic, biocompatible, and non-toxic.

INFORMATION

- **warranty 1 anno**
