

Electric scooter rack h424_99

Steel electric scooter rack. Dimensions: W.1496xD.510xH.742 mm

Electric scooter rack suitable for accommodating large electric scooters. It has housing for **4 scooters**. Incorporates a system to house/hold the scooter by rotating the handlebar on the rack. It is **modular**, which allows it to be installed side by side, forming large parking areas. The housings incorporate rubber protection around their perimeter to prevent damage due to friction on the scooter's shaft.

Technical features:

- Material: galvanized steel
- Finished with thermosetting polyester resin powder coating.
- Self-standing as it is very stable, which allows for use without anchoring to the ground. (Includes rubber feet),
- Can be anchored to the ground with 2 M8 expansion bolts (included).
- Dimensions: W.1496xD.510xH.742 mm
