

Electric workbench L. 150 cm h826_37

Professional electric workbench 1500x800 mm, 28 mm scratch-resistant laminate top, cable duct with 6 sockets and legs with lockable safety compartments.

The **electric workbench** represents an advanced solution for the setup of technical workstations where precision and immediate availability of energy are fundamental requirements. Designed for industrial environments and laboratories, this model integrates a robust **28 mm thick worktop** covered in scratch-resistant laminate, ideal for resisting mechanical stress and daily wear. The load-bearing structure, finished in **RAL 7035 gray**, is composed of boxed sheet metal legs that include a practical internal compartment protected by a lock, optimizing the management of personal tools or sensitive equipment.

Technical characteristics

- **Dimensions:** L. 1500 x D. 800 x h. 870 mm
- **Worktop:** High-thickness scratch-resistant laminate (28 mm)
- **Structure:** Boxed sheet metal legs with internal door and safety lock
- **Electrification:** Integrated under-top metal cable duct
- **Electrical protections:** 1 residual current circuit breaker with overcurrent protection (RCBO), 2 bipolar switches, 2 fuse holder sockets
- **Power points:** 6 civil 10/16 A sockets Italian/German standard 220V
- **Finish:** Industrial painting RAL 7035 gray
