

Electric workbench with riser L. 200 cm h826_42

Electric workbench with riser, scratch-resistant laminate top 2000x800 mm, double electrified trunking and legs with protected storage compartments.

The **electric workbench with riser** is a professional workstation designed to optimize operations in mechanical workshops, electronic laboratories, and industrial departments. The structure combines the robustness of **box-section sheet metal** with a 28 mm **scratch-resistant laminate** work surface, ensuring resistance to wear and ease of maintenance. The configuration includes an integrated storage system in the legs, equipped with lockable doors, and a metal riser with a coordinated top to expand useful space vertically.

The distinctive element of the product is the **double electrical equipment**: a metal trunking is housed under the top to power main loads, while a second trunking is integrated into the riser to manage additional instrumentation and lighting. Safety is guaranteed by a residual current circuit breaker with overcurrent protection (RCBO) and fuse-protected sockets, making it ideal for technical contexts requiring high connection density.

Technical specifications

- **Total dimensions:** L. 2000 x D. 800 x h. 1540 mm
- **Color:** Grey RAL 7035 (standard industrial finish)
- **Worktop:** Coated in scratch-resistant laminate, thickness 28 mm
- **Base structure:** 2 legs in box-section sheet metal equipped with an internal door with safety lock
- **Riser:** Structural metal sides and upper laminate top
- **Under-top electrification:** 1 metal trunking including 1 RCBO switch, 2 bipolar switches, 2 fuse holders and 6 domestic sockets 10/16 A standard ita/ger 220V
- **Riser electrification:** 1 metal trunking applied under the top with 2 bipolar switches, 2 fuse holders and 6 domestic sockets 10/16 A standard ita/ger 220V
