Electronic hotel safe for computers with LED display h7661

Furniture safe with digital electronic combination and guest-changeable code. LED display. Emergency lock.

The **h7661 hotel safe** is a security solution with a linear design and advanced technology, specifically designed to accommodate **laptops up to 15 inches**. This model responds to the operational needs of business guests to store bulky electronic devices inside the room, offering a **motorized lock** controlled by a high-reliability electronic system. Management is simplified by a high-contrast **6-position LED display** that signals every function, while the hotelier's security is guaranteed by the possibility of programming a Master code and the presence of a centralized emergency key. Robustness is ensured by a 4 mm door and a resistant black powder coating, ideal for built-in installation in furniture or wardrobes.
