

Electronic hotel safe h3475

Professional "Laptop Size" electronic safe with motorized opening and 6-digit display. Equipped with internal LED light and dual password. Dimensions: W 50.8 x D 38 x H 20 cm.

The **front-opening electronic safe** (50 cm) is the definitive security solution for hotels, holiday homes, and B&Bs wishing to offer the highest standard of storage to their guests. Thanks to its generous dimensions, this model solves the operational problem of protecting bulky electronic devices, comfortably accommodating **laptops up to 17 inches**, tablets, SLR cameras, as well as documents and personal valuables.

The system is characterized by a **motorized opening** of the bolts, ensuring a smooth and modern user experience: upon entering the correct code, the door unlocks automatically without the need for manual rotation of knobs. The **6-digit LED display** and the **internal LED light** ensure optimal visibility even inside dark wardrobes or niches. Management is entrusted to a dual password system (**Master and User**), fundamental for allowing the facility management to perform emergency openings in total safety.
