

Electronic hotel safe h718_03

Professional top-loading safe for hotel drawers and furniture. Suitable for laptops up to 14", equipped with a 5 mm door, backlit LED display and 100-event memory. Dimensions: 40 x 35 x H 12.7 cm.

The **top-loading safe** represents the most ergonomic and discrete solution for security in hotel rooms, B&Bs, and vacation homes. Designed to be installed inside drawers, desk bases, or low shelves, this unit solves the accessibility problem typical of front-opening models, allowing guests to manage their belongings with a full view from above. With a reduced thickness of only 12.7 cm, it integrates perfectly into modern furniture without sacrificing robustness, guaranteed by a **5 mm steel door**.

The device is technologically advanced: the **backlit LED display** and the **internal LED light** ensure perfect visibility even in low light conditions. Despite the slim profile, the compartment is optimized to accommodate **laptops up to 14 inches**, tablets, and documents. For professional management of the facility, the safe integrates an **Audit Trail (event memory)** function that allows the last 100 accesses to be viewed directly on the display, in addition to offering a double emergency unlocking system (Master code and override key).

Technical features

- **External dimensions:** W 400 x D 350 x H 127 mm
- **Internal dimensions:** W 397 x D 347 x H 70 mm
- **Capacity:** Suitable for Laptops up to 14"
