

Electronic hotel safe with internal light for PC h7644

Free-standing hotel safe with motorized digital electronic combination, backlit keyboard and internal lighting. Capable of holding a 15" PC.

The **h7644 electronic hotel safe** is a state-of-the-art security device, designed to meet the highest protection and functionality requirements in hospitality facilities. Characterized by a free-standing structure with a **5 mm door**, this safe is sized to easily accommodate a **15-inch laptop**. The motorized locking system is controlled by a high-reliability electronic mechanism, supported by a 6-position blue LED display and a **backlit keyboard** that activates when any key is pressed. The internal LED lighting, which turns on automatically upon opening, ensures maximum visibility of the contents for the guest.

For professional management, the safe allows the hotelier to program an exclusive Master code and monitor usage by viewing the last 100 events directly on the display. If necessary, management can use the key lock for emergency mechanical opening.

Technical characteristics

- **Thickness:** Door 5 mm, body 2 mm.
- **Capacity:** 27 liters (ideal for 15" notebooks).
- **External Dimensions (HxWxD):** 20 x 40.5 x 41 cm.
