## Electronic safe with RFID reader h76\_90

Electronic safe with digital keypad and RFID reader for smart cards.

The **h76\_90 electronic safe** represents a cutting-edge solution for hotel security, integrating a dual access mode: **digital keypad and RFID reader**. Designed to comfortably accommodate **laptops up to 15 inches**, this safe uses MIFARE technology (ISO/IEC 14443 standard) to allow opening via smart card, simplifying the guest experience. The structure is extremely robust, with a **5 mm door** and a 2 mm body, solving the protection needs of electronic devices and valuables. The ergonomics are handled down to the smallest detail thanks to the **blue LED backlit keypad** and automatic internal lighting, guaranteeing maximum visibility even in poorly lit environments such as the inside of wardrobes.

## Technical specifications

- **External dimensions:** 405 x 410 x 200 mm (WxDxH)
- **Internal dimensions:** 400 x 350 x 195 mm (WxDxH)
- **Capacity:** Suitable for 15" notebooks
- **Access Technology:** RFID reader for MIFARE smart cards and digital keypad
