

Electronic wall safe for hotels h3106

Laser-cut wall safe with internal LED light upon opening, suitable for hotels and holiday homes. Dimensions: H.210 x W.310 x D.150 mm.

This **professional wall safe** represents the pinnacle of home passive security, featuring a **monoblock front frame** made with "high-tech" laser cutting. The manufacturing precision reduces the gap between the frame and the door to just 2/10 mm, making break-in attempts extremely difficult. The structure features **robotic welding** with high resistance and a heavy-duty hinge with self-lubricating bushings, anchored in a recessed position. Accessibility is optimized by the **full-width opening** and the internal LED light that activates when the door is opened.

The security system is managed by an **electronic lock with motorized bolt retraction**. The control logic allows for a user code of 6 to 10 digits to be set, protected by a non-volatile memory that ensures code retention even in the total absence of power. The 12-key membrane keypad manages the electronics, powered by four 1.5V alkaline batteries. In case of emergency, external power can be used via a 9V battery and the supplied connector.

Technical features

- **Material:** High-thickness special steel (monoblock front).
- **Cutting technology:** Laser with 2/10 mm gap between frame and door.
- **Lock:** Motorized electronic with 2 steel bolts (Ø 22 mm).
- **External Dimensions:** 31 x 21 x 15 cm (W x H x D).
- **Internal Dimensions:** 29 x 19 x 10.5 cm (W x H x D).
- **Capacity:** 5.8 liters.
- **Weight:** 9 kg.
- **Equipment:** 1 internal shelf, LED light, external power connector.
- **Finish:** Epoxy powders with double phosphating.
