

Elegant bench for public spaces h678_14

Concave bench for urban furniture with an elegant design and backrest. Available in various colors.

The concave bench with backrest represents an elegant furnishing element, ideal for furnishing in a refined and exclusive way urban areas of particular interest, such as main squares, church squares and outdoor areas of schools and public buildings. Thanks to the **particular concave shape, the bench allows for sinuous installations**, giving the urban space elegant and essential lines. The product consists of a structure in calendered tubes with a diameter of 18 mm in polyester powder-coated and hot-dip galvanized steel. The bench for public spaces is designed for ground fixing with anchor bolts.

The product surfaces undergo a **special treatment**, in order to be resistant to wear over time and the aggressiveness of atmospheric agents.

To form a semicircle, 4 modules must be placed side by side and coupling plates must be provided.
