

Elegant outdoor drinking fountain h677_15

Concrete fountain for public spaces with an elegant design. Dimensions: W. 550 x D. 1500 x H. 850 mm. Available in various finishes.

Outdoor fountain made of **high-resistance concrete** with a homogeneous mosaic structure, **available in various finishes**. The surface of the fountain is finely polished and treated with a special protective coating so as to be resistant to wear over time and atmospheric agents. The drinking fountain is also equipped with a **button that limits the water flow** and creates a uniform jet. The metal elements are instead made of **stainless steel**. The complete fountain set includes the pipes for waste water and clean water, and flexible fittings.

Technical features:

- Dimensions: W. 550 x D. 1500 x H. 850 mm
- Weight: 420 kg
- Material: fiber-reinforced concrete
- Available in various finishes
- Treatment with protective layer
- Button to limit the water jet
- Metal elements of the fountain are in stainless steel

**The goods unloading service is not included in the supply. Upon the customer's request and subject to a quote, it is possible to request a valuation.*
