

## Emergency backpack h655\_40

Professional emergency backpack in technical fabric, dimensions 52x40x28 cm, with large compartmented front pocket and reinforced handle.

The **emergency backpack** is a logistical device designed to optimize the organization and transport of critical medical equipment. Developed to meet the needs of **doctors, ambulance crews and medical guard personnel**, this support allows for an orderly management of supplies thanks to the rational subdivision of internal and external spaces. The structure is designed to guarantee immediate access to rescue devices in emergency situations, reducing response times in the field.

## Technical features

- **Transport:** Equipped with a reinforced top handle for a secure and easy grip.
- **Organization:** Large external front pocket equipped with various compartments for small items.
- **Configuration:** Supplied empty to allow maximum customization (content not included).
- **External dimensions:** W. 52 x D. 40 x H. 28 cm.
- **Structure:** High-capacity main compartment for diagnostic and therapeutic devices.
