

## Emergency basket stretcher h567\_05

**Toboggan stretcher** with aluminum frame and adjustable footrest. Load capacity **278 Kg.**

**Emergency stretcher** made of high-density polyethylene with an aluminum frame, complete with a polyurethane foam mattress and adjustable footrest. The perimeter frame allows for excellent rigidity and a good grip point for handling, equipped with rings to fix the perimeter rope hooks for attaching accessories. The rounded corners of the lower part of the stretcher allow for less friction during dragging on rough terrain. Equipped with a mattress to increase comfort, compatible with all spine boards. Supplied with 3 quick-release safety belts. Very light, it is suitable for transporting injured people in difficult conditions, in cases of rescue on ski slopes, water and generally in open spaces. The **rescue and recovery stretcher** is equipped with a rigid "basket" cage frame suitable for water rescue, for transport by helicopter rescue and patrol boat. **The stretcher cannot be used vertically.**

### Technical Features:
