

Emergency Basket Stretcher h567_25

Emergency stretcher divisible into 2 parts. Capacity: 280 kg. Dimensions: L217 x W62 x H18.5 cm.

Emergency basket stretcher, specifically for the recovery of patients in locations difficult to reach with rescue vehicles. Also ideal for water rescue and rough terrain. Made of **high-density polyethylene** with an aluminum frame and **divisible into two parts** to make transport practical and simple. The perimeter frame ensures a good grip, while the rounded corners of the lower part allow for less friction during dragging on rough ground. Supplied complete with **hook attachment rings, perimeter rope, mattress, footrest, and 3 safety belts**.

Technical features:

- Dimensions: L217 x W62 x H18.5 cm
- Capacity: 278 kg
- Material: high-density polyethylene and aluminum
- Divisible into 2 parts
- With expanded polyurethane mattress
- No. of handles: 12
- Adjustable footrest included
- 3 safety belts included
- N.B. the stretcher cannot be used in a vertical position
