

Emergency oxygen bag h655_24

First aid bag with compartment for 2 l oxygen cylinder. Dimensions: W51 x D25 x H19 cm.

Emergency bag specifically designed for the transport of a **2 l oxygen cylinder** with attached pressure regulator. Complete with **compartments** for inserting additional equipment such as resuscitation masks, cannulas and other items. It also features a **removable additional pocket** attached with velcro that can hold intubation instruments and a further **pocket for oxygen pressure monitoring and regulation**. Easy to carry thanks to the **shoulder strap and handles** with adjustable length. Its compact design makes it portable anywhere, plus it can also be positioned vertically, so as to take up even less space. Each pocket is equipped with **resistant zippers**, in particular the main compartment ensures faster access to deal with emergency situations.

Technical features:
