

Emergency rescue backpack h690_01

Super spacious first aid backpack. Material: polyester. Capacity: 46.5 lt.

Emergency backpack specifically designed for providing assistance to the injured in places difficult to reach with vehicles. **Practical, easy to handle and spacious**, it ensures freedom of movement for the user and allows for excellent distribution and organization of the contents inside. The entire structure is made of **waterproof polyester** and features a MOLLE system throughout the exterior, to allow for the anchoring of additional pockets and various materials. Equipped externally with a removable side handle, top handle, **padded shoulder straps** and 2 closing straps, one at waist height and one at chest height, suitable to ensure a good grip and comfortable transport. Internally it features removable compartments, straps for fixing oxygen cylinders and several pockets, including a pocket for a hydration bag complete with a hole for tube extraction. The backpack is also provided on the outside with **reflective strips** to ensure visibility even in the dark.
