

Emergency scoop stretcher h655_02

Scoop stretcher for transporting the injured. Supplied with safety belt. Dimensions: L205 x W43 x H8 cm.

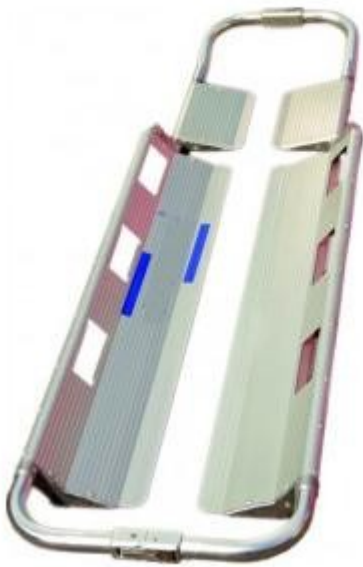

First aid stretcher perfect for transporting the injured from the accident site to the hospital. Characterized by a **lightweight anodized aluminum structure**, which makes it very easy to transport and move. It allows the patient to be transferred in a simple, **practical and safe** manner, as it must be opened and pushed laterally under the injured person, avoiding the need to lift or move them. For this very reason, its use is recommended in cases where the patient has suffered serious back injuries. Included in the supply is the **safety belt**.

Technical features:

- Dimensions: L205 x W43 x H8 cm
- Material: anodized aluminum
- Supplied complete with safety belt
