

## Emergency spill kit for hydrocarbons and derivatives h1045\_01

Emergency spill kit h1045\_01 oil-absorbent for hydrocarbons. Nylon bag with 30 sheets, socks, pillows, and PPE for outdoor spills.

The **Emergency spill kit for hydrocarbons and derivatives h1045\_01** is a technical and centralized solution developed to contain and remediate accidental spills of oily substances on soil or water surfaces. This system solves the operational problem of uncontrolled dispersion of pollutants in outdoor environments (even under rain), on water surfaces, or near water-based processes, where it is essential to retain oils while isolating them from water. The target audience consists of company safety managers, industrial maintenance personnel, and logistics operators who must comply with regulations for managing potentially hazardous liquid substances. The absorbent materials contained in the bag belong to the "oil only" line, specific for absorbing all hydrocarbon-derived products without taking in water, ensuring compliance with Iso 14000, Adr, and D.M. 20/2011 procedures. The kit includes personal protective equipment and tools to circumscribe the area, stop the leak at the source, and rapidly collect large quantities of liquids in a very short time.

## Technical features

- **Identification code:** h1045\_01
- **Included container:** Orange nylon bag with dimensions 65x75 h cm
- **Included absorbent sheets:** Number 30 sheets pre-cut transversally and longitudinally, consisting of three ultrasonically welded layers
- **Included socks:** Number 4 absorbent socks, for circumscribing the perimeter of the spill
- **Included pillows:** Number 4 absorbent pillows, for use in narrow spaces or as a preventive base
- **Included loose fiber:** Number 1 bag of oil-absorbent fiber
- **Personal Protective Equipment (P.P.E.):** Number 1 pair of safety gloves and number 1 protective mask
- **Collection and disposal accessories:** Number 6 specific bags for the storage and disposal of saturated materials
- **Operational support:** Number 1 detailed instruction sheet with methods of use for remediation
- **Absorbent material properties:** Hydrophobic (repels water) and oleophilic (absorbs hydrocarbons and derivatives)
- **Reference environmental regulations:** D.Lgs. 152 of 03.04.06 and subsequent amendments with D.Lgs. 4 of 16.01.08, Iso 14000 procedures, Adr, D.M. 20/2011 and compliance with European regulations
