

Emergency spinal stretcher h1046_07

Emergency spinal stretcher h1046_07 in black carbon fiber. Revolutionary spinal board, foldable and radiotranslucent. Weight: 4.6 kg.

The **emergency spinal stretcher h1046_07** is a revolutionary spinal board in carbon fiber, foldable into two parts, specifically designed for **ambulance health workers, helicopter rescue crews, medical motorcycle teams, and rescuers in inaccessible environments**. This state-of-the-art medical device solves the operational problem of **minimizing weight and logistical bulk during transport, while ensuring immediate structural stiffening and total radiotranslucency to avoid painful and risky patient movements during diagnostic tests**. The system stands out for an extremely rapid preparation and stiffening through two sliding and integral side rails. Thanks to an ultra-thin thickness of only 5 mm and a weight of less than 5 kg (equal to 4.6 kg net), it significantly facilitates the critical patient rotation maneuver ("Log Roll"). Completely free of any metal parts and entirely produced in Italy, the board complies with the requirements of EU Regulation 2017/745, establishing itself as a high-quality patented product.

Technical characteristics

- **Product type:** foldable emergency spinal board
- **Compliance standard:** EU REGULATION 2017/745
- **Main construction material:** carbon fiber
- **Structural mass (Weight):** 4.6 kg
- **Total length (open):** 181 cm
- **Total width:** 42 cm
- **Profile thickness:** 5 mm
- **Shell color finish:** black
- **Folding mechanism:** foldable in two parts
- **Locking and rigidity system:** two sliding and integral side rails for ultra-fast setup
- **Diagnostic properties:** free of metal parts, completely radio-transparent (compatible with C.T. scans, MRI, and X-ray equipment)
- **Air rescue readiness:** designed in detail for pairing with hoisting slings for helicopter rescue
- **Compatible immobilization systems:** patient locking straps (supplied separately)
- **Intellectual property legal status:** patented product
- **Origin and manufacture:** completely developed and produced in Italy
- **Technical survey reference:** file named "image_556fac.png"
