

Emergency stretcher h13_282

Radiotransparent plastic stretcher for immobilization and transport, extendable up to 200 cm, foldable and with a capacity of 159 kg.

The **radiotransparent plastic stretcher** is a medical device designed specifically for the safe immobilization and transport of trauma patients. Its configuration has been studied to stabilize the patient during every phase of the rescue, minimizing involuntary movements. Thanks to the folding structure, the device is extremely functional for equipping ambulances and rescue vehicles where space optimization is essential.

Technical features

- **Material:** high-resistance plastic
- **Properties:** radiotransparent (allows diagnostic examinations without movement)
- **Splitting system:** quick coupling and release device for the separation of the stretcher into two parts
- **Adjustment:** adjustable length with automatic locking system
- **Equipment:** bag included with three quick-release safety belts
- **Transportability:** lightweight structure and easy to move
- **Maximum capacity:** 159 kg
- **Folded dimensions:** 118 x 44.5 x 8.5 cm
- **Open dimensions:** minimum 164 x 44.5 cm - maximum 200 x 44.5 cm
