

Emergency stretcher h448_28

Emergency stretcher for patient transport with adjustable height **load capacity 225 Kg**. L.210 x D.66 x h. 60-98 cm.

Robust steel frame with epoxy coating, height adjustable via hydraulic actuator are some of the features of this Patient Transport Stretcher. Furthermore, the surface is upholstered in **synthetic imitation leather, M2 fireproof**, interior in high-density 25Kg/m³ foam, plus the surface has antimicrobial protection, antibacterial protection, antifungal protection and high resistance to abrasion... all qualities that make **the Emergency Stretcher h448_28** of high quality. It is ideal for hospitals, first aid and clinics.

Technical Features:

- Steel frame with epoxy coating
- Height adjustable via hydraulic actuator
- Two sections
- Adjustable head with gas spring 70°
- Folding side rails
- Height-adjustable IV pole support
- Load capacity 225 Kg
- 125 mm wheels, two with brakes

Synthetic imitation leather upholstery, M2 fireproof, interior in high-density 25Kg / m³ foam

- Antimicrobial protection.
- Antibacterial protection.
- Antifungal protection.
- High resistance to abrasion.
- Dry Martindale test > 51,200 cycles.
- Wet Martindale test > 12,800 cycles.
- Wyzenbeek test > 70,000 cycles.
- Resistance to human sweat and saliva.
- Resistance to urine.
- Resistance to blood.
- Stain-resistant material.

Other colors different from those proposed are available upon request.
