

Emergency thermal blanket h708_21

Emergency blanket for protection from heat or cold. Dimensions: 160 x 210 cm.

Emergency thermal blanket to be used in first aid operations to allow thermal stabilization of the patient. Designed to **protect both from the cold** by using it with the gold layer facing outwards, **and from the heat** by using it with the silver layer facing outwards to deflect solar rays.

Technical features:

- Dimensions: 160 x 210 cm
- With 1 gold layer and 1 silver layer
- For protection from the cold: use with the gold layer facing outwards
- For protection from the heat: use with the silver layer facing outwards
