

Emergency thermal blanket h708_24

Emergency thermal sheet with heat pads. Dimensions: 86 x 122 cm. Can also be used as a transfer sheet.

Thermal blanket for first aid operations, suitable for allowing ambulance personnel to protect people rescued after accidents from the cold. Equipped with **heat pads** that reach a **minimum temperature of 40°C** within 15/20 min, maintaining it for 10 hours. Given its **high strength and resistance**, this emergency sheet is also ideal for use as a transfer sheet, allowing patients up to a maximum of 113 kg to be transported.

Technical characteristics:

- Dimensions: 86 x 122 cm
- With heat pads
- Minimum temperature of 40°C reachable in 15/20 min
- Temperature maintenance for 10 hours
- Can also be used as a transfer sheet with a load capacity of 113 kg
