

Professional tray clearing bin cabinet h11101

Professional tray clearing bin h11101 in stainless steel or zinc-plastic coated sheet metal. Swing door, top shelf with rim, lockable compartment. L. 60 x D. 60 x h. 120 cm. Optional: rubber wheels.

The **tray clearing bin h11101** is a solution dedicated to the hygienic and orderly management of waste in self-service environments such as canteens, restaurants, and fast food outlets. It allows for keeping service areas clean and well-organized, facilitating operational flow during peak times.

The structure is available in three construction variants: **AISI 304 stainless steel, AISI 430 stainless steel, or grey zinc-plastic coated sheet metal**. All materials are resistant to corrosion and chemical stresses from professional detergents, ensuring long-term durability and ease of daily cleaning.

The **swing door** allows for quick and hygienic tray emptying without the need to lift lids, reducing direct contact with waste. The **top shelf with tray-stop rim** provides a safe temporary storage space, preventing accidental falls during waste management.

The **lower compartment with a lockable door** houses the waste bag (not included) and ensures controlled access to stored waste, maintaining order and security in the area.

For contexts requiring frequent movement, a **set of 4 rubber wheels Ø 50 mm** (2 with brakes and 2 without brakes) is available as an **optional** extra, mounted on a nickel-plated plate, which provides greater mobility to the trolley.

Technical characteristics

- **Dimensions:** L. 60 x D. 60 x h. 120 cm
- **Material:** AISI 304 stainless steel, AISI 430 stainless steel or grey zinc-plastic coated sheet metal
- **Door:** Swing door for tray emptying
- **Top shelf:** With tray-stop rim
- **Bag compartment:** With lockable door
- **Bags:** Not included in the supply

Optional

- **Wheels:** Set of 4 rubber wheels Ø 50 mm (2 with brakes, 2 without brakes) on nickel-plated plate
