

Equippable computer classroom desk 120x80 h908_205

Computer classroom table in steel with ivory top 120x80 cm. Ergonomic C-shaped Size 6 structure for secondary schools and training centers.

The **H908_205 table** is a technical solution designed for the professional setup of computer labs, school laboratories, and training centers. Thanks to the **Size 6** classification, the module meets the ergonomic parameters necessary for use by secondary school students and adult users, ensuring correct posture during prolonged work sessions.

Structural solidity is ensured by a **painted steel** frame with "C"-shaped legs made of 40 mm diameter tubing. This particular geometry not only provides high mechanical resistance and stability but also optimizes ergonomics by freeing up the space below for the operator's legs and facilitating hardware cabling management. The 120 x 80 cm worktop offers a generous operational surface, suitable for neatly accommodating monitors, peripherals, and educational materials.

Technical features

- **Type:** Single-user computer table
- **Structure:** "C" legs in Ø 40 mm steel tube
- **Frame finish:** Aluminum color powder coating
- **Top dimensions:** 120 x 80 cm
- **Height:** 76 cm (Size 6 - EN 1729 Standard)
- **Top color:** Ivory
- **Intended use:** Secondary schools, laboratories, technical offices

Available options:

- Under-top CPU holder in steel sheet
- Pull-out keyboard tray in black finish
- Ø 60 mm cable hole with polypropylene cap
- Plastic cable duct for wiring management
