

Ergonomic multi-purpose chair h872_02

Ergonomic school chair in polypropylene and metal, size 6 for heights 159-188 cm, equipped with integrated handle and anti-scratch feet.

The **Multi-purpose Chair h872_02** represents an advanced technical solution for school furniture, designed to ensure the ergonomic support necessary during prolonged study sessions. The combination of a **polypropylene shell** with high resistance and a **tubular metal structure** with epoxy coating ensures superior durability against impacts and daily wear in high-traffic environments. The shaped backrest is designed to follow the natural curvature of the spine, promoting a correct posture specifically for students over 12 years old.

Technical features

- **Shell:** High-density polypropylene, ergonomic and easy to maintain.
- **Frame:** Robust tubular metal with epoxy coating treatment resistant to external agents.
- **Ergonomics:** Curved backrest for lumbar and postural support.
- **Handling:** Integrated handle at the top of the backrest for a secure grip.
- **Protection:** Rubber pads at the base of the legs with anti-slip, anti-noise, and anti-scratch functions.
- **Dimensional classification:** Size 6 (optimized for users with a height between 159 and 188 cm).
- **Color:** Green.
- **Target:** Students aged 12 and up.
