

## Ergonomic stool for clinics h904\_11

Clinic stool with saddle seat and multi-position backrest. Aluminum base. W. 50 x D. 50 x h. from 60 to 85 cm.

**Medical stool with multi-position backrest and saddle seat**, ideal solution for healthcare and clinical environments, designed to ensure maximum comfort and functionality. Its **sturdy metal structure** ensures **durability and stability**, while the **aluminum star base** offers solid support and easy mobility thanks to the integrated wheels. The **saddle seat**, ergonomically designed, and the **backrest adjustable in different positions** allow for maintaining a correct posture during long work sessions, reducing the risk of fatigue and musculoskeletal problems. Both are made of **4 cm thick semi-hard foam**, ensuring a perfect balance between softness and support. The **stool height** is easily **adjustable from 60 cm to 85 cm**, adapting to different operational needs and personal preferences. The **fabric upholstery**, available in a **wide range of colors**, not only provides a pleasant aesthetic touch but è also practical and resistant, designed to last over time and easy to clean. In summary, this stool for medical offices combines ergonomic design and high-quality materials, offering a professional and versatile piece of furniture, ideal for improving the efficiency and well-being of healthcare workers.
