

Evacuation chair h708_35

Folding painted steel evacuation chair with 182 kg capacity. Ideal for emergency transport in hospitals and healthcare facilities. The **H708_35 evacuation chair** is a critical device for managing emergencies in multi-story buildings where the use of the elevator is precluded. Designed for hospitals, nursing homes, and public environments, it addresses the problem of moving people with reduced mobility quickly and safely to the lower floors. The **steel structure** ensures maximum solidity, while the ergonomic hammock-shaped seat ensures stability during descent and high visibility thanks to the contrasting yellow color.

Technical specifications

- **Structure:** durable and sanitizable textured blue painted steel
